Art Unit: 1644

1. Applicant's election of the species equine respiratory complex in Paper no. 12 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse. See MPEP section § 818.03(a)).

2. Claims 22,23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 12.

3. Claims 1-15,21,24-26 are under consideration.

4. The following additional species election is now required.

5. This application contains claims directed to the following patentably distinct species of the claimed invention.

a) The method of claim 1,2 which recites treating or preventing EIPH.

b) The method of claim 1 which recites treating or preventing respiratory disease complex.

c) The method of claim 1,21,24-26 which recites treating or preventing upper respiratory infections accompanying stress.

These diseases are different diseases with different symptoms and causes.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. This application contains claims directed to the following patentably distinct species of the claimed invention.

a) The method of claim 1 which is administered by any one of the routes recited in claims 6-9. These are different methods that use distinct methods of administration.

7. Claim 13 is generic to a plurality of disclosed patentably distinct species comprising the method which uses

Art Unit: 1644

- a)IgG
- b)IgGt
- c)IgM
- d)IgA
- e)IgE
- f)IgM.

These are distinct forms of Ig which are chemically and functionally distinct.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.
